

## A comprehensive fire protection system for hotels

Fire protection is of utmost importance in any hotel, as it ensures the safety and well-being of guests and staff. Viking water mist systems are well suited for the various risks that can be found within such buildings, ensuring effective protection of all areas.

### *Features and advantages at a glance:*

- Low water consumption and discharge reduce the chance of significant water damage to expensive furnishings
- Space saving components allow owners to maximize space
- Small pipe diameters and concealed nozzles serve for efficient and discreet solutions where needed
- Electric pumps require less maintenance than diesel fire pumps, saving time and money on testing requirements
- Quick response nozzles raise the alarm swiftly, enabling proficient evacuation and fire management in case of an emergency
- The system comes with low cost of ownership

### APPLICATION IN FOCUS

Hotels can pose complicated fire risks due to increased capacity and occupants unfamiliar with their surroundings. When installing water mist systems, operators can comply with building regulations, ensuring a **compliant**, safe structure for guests and employees alike.

The EconAqua water mist system:

- has successfully passed the rigorous 3rd party testing protocols set by VdS
- complies with the requirements of EN14972-1:2020 as published by CEN

**Fire-safe living and working** should be the goal for all building owners. Water mist systems offer a **proven solution** that is clean, cost-effective and that reduces risk - giving owners peace of mind.
